THE EMERGING STAR AWARD

PERIOD UNDER REVIEW: 1 APRIL 2023 TO 31 MARCH 2024

Criteria: The Emerging Star will be a private or young public mediscience company that has demonstrable credibility in terms of business model/strategy, management team and financing. The winner's focus on innovation will also be key, with its technology/IP capable of significant market impact or disruption.

The Emerging Star may not be able to demonstrate too much of a track record, but it will be judged against the demanding criteria that exist for its quoted company peers. The purpose of this award is to broaden knowledge, exchange ideas and help private businesses understand what could be required of them in the quoted company universe.

Company name

Company address, including country of incorporation
