13 March 2021

Dear Jo,

Thank you so much for your recent gift of £2,662.15 to Kidney Research UK. We were delighted to be chosen as one of the beneficiary charities of the European Mediscience Awards 2021 and we hope everyone had an enjoyable evening. We are incredibly grateful for your support and your generous donation towards our life-saving research.

Your gift will be used to help fund our 'Transforming Treatments' research programme, which is focused on improving dialysis, transplantation and medical technology for the 70,000 people in this country who have suffered kidney failure. We are hoping to raise a total of £3million for this programme over the next three years to fund new research at universities and hospitals across the UK.

Kidney Research UK is reliant on the generosity of our supporters to continue our work to find a cure for kidney disease. Every piece of research brings us one step closer to transforming treatments and freeing lives from kidney disease.

Thank you for supporting Kidney Research UK. With your help, kidney disease ends here.

With very best wishes,

Gemma
